

BUY AMERICAN PROGRAM **Manufacturer's certificate**

The Buy American provisions restrict the purchase of supplies that are not specifically designated as U.S. domestic manufactured end user products.

There are no specific requirements regarding the origin of the components, as long as the components are designed and manufactured in compliance with internationally recognized standards, and that they are specifically documented and bound for use in the U.S. and Canadian market.

BROEN is an International Company, that is ISO Certified and holds an International API license.

BROEN Ballomax Valves are manufactured in our U.S. facility located in Houston, Texas.

All valves manufactured in Texas meet or exceed the requirements for use in the North American Natural Gas market. Each valve produced undergoes strict testing in accordance to API 6D.

A manufactured good is a good brought to the construction site for incorporation into the building or work that has been processed into a specific form or shape; or combined with another raw material to create a material that has different than the properties of the individual raw material.

Our understanding of 2 CFR176.140 (a) (1) is that there is no requirement with the regard to the origin of components or subcomponents in manufactured goods used in a project, as long as, the manufacturing occurs in the United States.

BROEN Ballomax Valves are manufactured in the United States using globally sourced components.

Attached is Appendix F : Determining Substantial Transformation from NIST.
