

GROEBNER

POWERED BY EXPERIENCE

Service Technician

Primary Location: Rogers, MN

Reports to: Director of Technical Service

Description: A leader in the natural gas industry since 1976, GROEBNER is a distributor and manufacturers' representative focused on natural gas companies and contractors. Now third generation led, we are proud to be family owned and operated for more than 50 years. Team GROEBNER has more than 650 years of combined industry experience and focuses every day on providing safe, reliable products, training, and services to our customers in support of their ever-changing needs.

Summary: The Service Technician will conduct efficient and accurate repairs, inspections and maintenance tasks as specified, adhering to GROEBNER, manufacturers and industry standards. They will thoroughly inspect equipment to assess the need for further service work. The Service Technician will offer hands-on training and guidance on the appropriate usage of equipment when necessary.

Responsibilities:

- Responsible for inspection, repair, and maintenance of PE fusion equipment (both onsite and during field visits)
- Tie workflow to schedules to ensure maximum efficiency
- Diagnose errors and technical problems and determine proper solutions to produce timely and detailed service reports
- Travel required up to 50% during inspection season (Nov – May)
- Follow all company procedures and protocols with attention to safety, detail, and accuracy
- Operate company vehicles and equipment in a safe manner
- Establish assistance by studying system requirements, including ordering, and gathering essential components and parts, completing the installation, and performing quality assurance tests
- Collaborate with technical team and share information across the organization to build positive relationships with customers and coworkers
- Provide fusion training to customers (both on-site and off-site)
- Maintain customer satisfaction by using creativity and ingenuity to investigate complaints, identify resolutions, suggest enhanced operating techniques, and recommend system improvements
- Service existing accounts by analyzing work orders, planning a daily travel schedule, reviewing concerns, conducting tests, and resolving problems
- Conduct cycle counts and inventory transfers as needed
- Properly document training, inspection, and repair services
- Ensure service area is organized, clean and meets all compliance requirements
- Provide back-up to shipping/receiving department
